 $<sup>^{\</sup>star}$  This refers to the position under the Banking (Capital) Rules in force on 31 December 2012.

#### Regulatory capital (continued)

#### Notes to the template:

Elements where a more conservative definition has been applied in the BCR relative to that set out in Basel III capital standards:

Row No.	Description	Hong Kong basis HK\$'000	Basel III basis HK\$'000
9	Other intangible assets (net of associated deferred tax liability)	0	0

#### Explanation

As set out in paragraph 87 of the Basel III text issued by the Basel Committee (December 2010), mortgage servicing rights (MSRs) may be given limited recognition in CET1 capital (and hence be excluded from deduction from CET1 capital up to the specified threshold). In Hong Kong, an AI is required to follow the accounting treatment of including MSRs as part of intangible assets reported in the AI's financial statements and to deduct MSRs in full from CET1 capital. Therefore, the amount to be deducted as reported in row 9 may be greater than that required under Basel III. The amount reported under the column "Basel III basis" in this box represents the amount reported in row 9 (i.e. the amount reported under the "Hong Kong basis") adjusted by reducing the amount of MSRs to be deducted to the extent not in excess of the 10% threshold set for MSRs and the aggregate 15% threshold set for MSRs, DTAs arising from temporary differences and significant investments in CET1 capital instruments issued by financial sector entities (excluding those that are loans, facilities or other credit exposures to connected companies) under Basel III.

10	Deferred tax assets net of deferred tax liabilities	130,573	0
----	---	---------	---

#### Explanation

As set out in paragraphs 69 and 87 of the Basel III text issued by the Basel Committee (December 2010), DTAs that rely on future profitability of the bank to be realised are to be deducted, whereas DTAs which relate to temporary differences may be given limited recognition in CET1 capital (and hence be excluded from deduction from CET1 capital up to the specified threshold). In Hong Kong, an AI is required to deduct all DTAs in full, irrespective of their origin, from CET1 capital. Therefore, the amount to be deducted as reported in row 10 may be greater than that required under Basel III.

The amount reported under the column "Basel III basis" in this box represents the amount reported in row 10 (i.e. the amount reported under the "Hong Kong basis") adjusted by reducing the amount of DTAs to be deducted which relate to temporary differences to the extent not in excess of the 10% threshold set for DTAs arising from temporary differences and the aggregate 15% threshold set for MSRs, DTAs arising from temporary differences and significant investments in CET1 capital instruments issued by financial sector entities (excluding those that are loans, facilities and other credit exposures to connected companies) under Basel III.

## 18 Insignificant capital investments in CET1 capital instruments issued by financial sector entities that are outside the scope of regulatory consolidation (amount above 10% threshold) 0 0

#### Explanation

For the purpose of determining the total amount of insignificant capital investments in CET1 capital instruments issued by financial sector entities, an AI is required to aggregate any amount of loans, facilities or other credit exposures provided by it to any of its connected companies, where the connected company is a financial sector entity, as if such loans, facilities or other credit exposures were direct holdings, indirect holdings or synthetic holdings of the AI in the capital instruments of the financial sector entity, except where the AI demonstrates to the satisfaction of the Monetary Authority that any such loan was made, any such facility was granted, or any such other credit exposure was incurred, in the ordinary course of the AI's business.

Therefore, the amount to be deducted as reported in row 18 may be greater than that required under Basel III. The amount reported under the column "Basel III basis" in this box represents the amount reported in row 18 (i.e. the amount reported under the "Hong Kong basis") adjusted by excluding the aggregate amount of loans, facilities or other credit exposures to the Al's connected companies which were subject to deduction under the Hong Kong approach.

#### Regulatory capital (continued)

Row No.	Description	Hong Kong basis HK\$'000	Basel III basis HK\$'000			
19	Significant capital investments in CET1 capital instruments issued by financial sector entities that are outside the scope of regulatory consolidation (amount above 10% threshold)	0	0			
	Explanation  For the purpose of determining the total amount of significant capital investments in CET1 capital instruments issued by financial sector entities, an AI is required to aggregate any amount of loans, facilities or other credit exposures provided by it to any of its connected companies, where the connected company is a financial sector entity, as if such loans, facilities or other credit exposures were direct holdings, indirect holdings or synthetic holdings of the AI in the capital instruments of the financial sector entity, except where the AI demonstrates to the satisfaction of the Monetary Authority that any such loan was made, any such facility was granted, or any such other credit exposure was incurred, in the ordinary course of the AI's business.					
	Therefore, the amount to be deducted as reported in row 19 may be greater than that required under Basel III. The amount reported under the column "Basel III basis" in this box represents the amount reported in row 19 (i.e. the amount reported under the "Hong Kong basis") adjusted by excluding the aggregate amount of loans, facilities or other credit exposures to the Al's connected companies which were subject to deduction under the Hong Kong approach.					
39	Insignificant capital investments in AT1 capital instruments issued by financial sector entities that are outside the scope of regulatory consolidation (amount above 10% threshold)	0	0			
	Explanation  The effect of treating loans, facilities or other credit exposures to connected companies which CET1 capital instruments for the purpose of considering deductions to be made in calculating row 18 to the template above) will mean the headroom within the threshold available fo deduction of other insignificant capital investments in AT1 capital instruments may be smaller deducted as reported in row 39 may be greater than that required under Basel III. The amou "Basel III basis" in this box represents the amount reported in row 39 (i.e. the amount reported adjusted by excluding the aggregate amount of loans, facilities or other credit exposures to twhich were subject to deduction under the Hong Kong approach.	the capital bas or the exemption r. Therefore, the unt reported und under the "Hon	se (see note re in from capital e amount to be der the column g Kong basis")			
54	Insignificant capital investments in Tier 2 capital instruments issued by financial sector entities that are outside the scope of regulatory consolidation (amount above					

10% threshold)

Explanation
The effect of treating loans, facilities or other credit exposures to connected companies which are financial sector entities as CET1 capital instruments for the purpose of considering deductions to be made in calculating the capital base (see note re row 18 to the template above) will mean the headroom within the threshold available for the exemption from capital deduction of other insignificant capital investments in Tier 2 capital instruments may be smaller. Therefore, the amount to be deducted as reported in row 54 may be greater than that required under Basel III. The amount reported under the column "Basel III basis" in this box represents the amount reported in row 54 (i.e. the amount reported under the "Hong Kong basis") adjusted by excluding the aggregate amount of loans, facilities or other credit exposures to the Al's connected companies which were subject to deduction under the Hong Kong approach.

The amount of the 10% / 15% thresholds mentioned above is calculated based on the amount of CET1 capital determined under the Banking (Capital) Rules.

## Liquidity information disclosures

### Liquidity coverage ratio

Nun	nber of data points used in calculating the average value of the Liquidity Coverage Ratio (LCR) and
rela	ted components set out in this table
Bas	is of disclosure: consolidated
Α.	HIGH QUALITY LIQUID ASSETS
1	Total high quality liquid assets (HQLA)
В.	CASH OUTFLOWS
2	Retail deposits and small business funding, of which:
3	Stable retail deposits and stable small business funding
4	Less stable retail deposits and less stable small business funding
5	Retail term deposits and small business term funding
6	Unsecured wholesale funding (other than small business funding) and debt securities and prescribed instruments issued by the institution, of which:
7	Operational deposits
8	Unsecured wholesale funding (other than small business funding) not covered in Row 7
9	Debt securities and prescribed instruments issued by the institution and redeemable within the LCR period
10	Secured funding transactions (including securities swap transactions)
11	Additional requirements, of which:
12	Cash outflows arising from derivative contracts and other transactions, and additional liquidity needs arising from related collaterals requirements
13	Cash outflows arising from obligations under structured financing transactions and repayment of funding obtained from such transactions
14	Potential drawdown of undrawn committed facilities (including committed credit facilities and committed liquidity facilities)
15	Contractual lending obligations (not otherwise covered in Section B) and other contractual cash outflows
16	Other contingent funding obligations (whether contractual or non-contractual)
17	TOTAL CASH OUTFLOWS
C.	CASH INFLOWS
18	Secured lending transactions (including securities swap transactions)
19	Secured and unsecured loans (other than secured lending transactions covered in Row 18) and operational deposits placed at other financial institutions
20	Other cash inflows
21	TOTAL CASH INFLOWS
D.	LIQUIDITY COVERAGE RATIO
22	TOTAL HQLA
23	TOTAL NET CASH OUTFLOWS

#### Liquidity information disclosures

#### Liquidity coverage ratio (continued)

#### Notes:

- The weighted amount of HQLA is to be calculated as the amount after applying the haircuts as required under the Banking (Liquidity) Rules.
- The unweighted amounts of cash inflows and cash outflows are to be calculated as the principal amounts in the calculation of the LCR as required under the Banking (Liquidity) Rules.
- The weighted amounts of cash inflows and cash outflows are to be calculated as the amounts after applying the inflow and outflow rates as required under the Banking (Liquidity)
   Rules.
- The adjusted value of total HQLA and the total net cash outflows have taken into account any applicable ceiling as required under the Banking (Liquidity) Rules.

In the first half of 2017, the Group has maintained a healthy liquidity position, the LCR remained stable and there was no material change throughout the period. The average LCR of the first and second quarter were 138.03% and 171.71% respectively. The average HKD level 1 HQLA to HKD net cash outflow ratio in the first half of 2017 was 177.03%, well above the regulatory requirement of 20%. The ratios have maintained at stable and healthy levels.

The HQLA consists of cash, balances at central banks and high quality marketable securities issued or guaranteed by sovereigns, central banks, public sector entities or multilateral development banks and non-financial corporate debt securities. In the first half of 2017, the

majority of the HQLA was composed of Level 1 HQLA.

The net cash outflow was mainly from retail and corporate customer deposit which are the Group's primary source of funds, together with deposit and balance from bank and other financial institution. To ensure stable, sufficient and diversified source of funds, the Group actively attracts new deposits, keeps the core deposit and obtains supplementary funding from the interbank market. Other cash outflow, such as commitment, cash outflow under derivative contract and potential collateral requirement, were minimal to the LCR.

Majority of the Group's customer deposits are denominated in HKD, USD and RMB. As the supply of HKD denominated HQLA in the market is relatively limited, the Group swaps surplus HKD funding into USD and other foreign currencies, part of funding are deployed to investment in HQLA.

13	Maximum Value	0
14	Average Value	0
15	Minimum Value	0
16	Period End	0
17	Floor	0

### MR4: Comparison of VaR estimates with gains or losses

Below is the 250-day history for back-testing results of the Group's market risk under IMM approach. Daily VaR is calculated at a 99% confidence level using two years of historical market data. During the period, no back-testing exception was observed for both actual loss and hypothetical loss when compared with daily VaR.

Actual P&L in back-testing does not include reserves, commissions and fees.
